## WILLIAMS—GAMBLE

A very beautiful wedding was solemnized at the First Baptist Church on Tuesday June 5th at 8:30 p.m., Rev. Dr. H. H. Bingham officiating, when Miss Muriel Gamble and Mr. E. S. Williams were united in holy matrimony.

The bride, Miss M. Gamble, preceded by a dainty flower girl, Mary Kennedy, and accompanied by two bridesmaids, Miss T. Shirriff and Miss F. Antilla entered upon the arm of her father, to the strains of Mendelssohn's wedding march played by Mrs. B. Chapman. The bridesmaids were dressed in pale blue and rose, and carried a shower of bouquets to match while the flower girl was dressed in pink fluffy frock with poke bonnet to match, carrying a basket of roses. The bride looked lovely in a Lafeta and lace dress with lace dress and pearl trimming with a net train. Mr. F. Williams acted as best man and Messrs J. Gamble, G. Hight and C. Rowe acted as ushers.

Mr. Harry Farrett sang charmingly during the signing of the register.

The church was beautifully banked with honeysuckle, lilacs and palms.

Gifts of gold collar buttons were presented to the best man and the ushers. Silver vanity cases were presented to the bridesmaids.

After the ceremony a reception for the guests was held at the home of the bride's father and mother. The table was tastefully decorated in mauve and pale pink and was centered with a three tier wedding cake. Dr. Bingham proposed the toast to the bride.

The bride and groom will spend their honeymoon in Edmonton and upon their return will reside in Mirror.

We are sorry to report the departure of our United church minister, Rev. Wood, who has been at Mirror for the past three years and is exceedingly well liked throughout this district. Rev. Wood is taking charge of the field at Killam this week and is followed by the good wishes of his host of friends here.

## W.I. Meeting

A regular meeting of the M. L. W. I. was held in the library building at 3 p.m. with the president in the chair, and twenty members and five visitors present. The minutes of the last regular meeting were read and approved. The cemetery committee asked as many as were able, to go to the cemetery on Monday evening at 7 o'clock to pull weeds.

Mrs. M. Olson suggested that the concert party that plays over CKLC would be asked to put on a concert in Mirror with 50 p.c. profits.

Moved by Mrs. Astle that meeting adjourn.

The ladies had the pleasure of a splendid address by Hon. Irene Farby on the subject of Immigration.

## FISH on FRIDAY

At Junget's Meat Market

## Local Brevities

Bert MacLeod left on Friday last to attend a convention of locomotive firemen at San Francisco, Cal., accompanied by his mother, Mrs. F. E. MacLeod. Bert is a delegate of the local Wm. Brown Lodge.

Mr. and Mrs. Sam Hyslop and family were Edmonton visitors Friday last.

Everyone patronize the noon luncheon in the W. I. building on Friday June 8th and hear Capt. Dancey speak. The menu will be: Beet relish, hot scalloped potatoes baked beans, baked ham. Rain pie, lemon pie, bread and butter tea and coffee. The charge is only fifty cents.

The Ladies Aid will meet on Wednesday the 14th at the home of Mrs. H. Brewster at 3 o'clock. Cars will leave the church for the convenience of those wishing to attend.

Mr. and Mrs. W. Fray left for a motor trip through the Western States.

Mr. George Hainey arrived on Saturday from Scotland.

Mr. and Mrs. Purcell spent Sunday at Pine Lake.

Miss Conroy, trained nurse of Edmonton gave a short course in home nursing on the 5th 6th and 7th, under the auspices of the Provincial Government.

Crop prospects were considerably brightened this past weekend when we were favored by some very acceptable showers.

A very heavy shower was reported at the Ripley district on Monday, as well as a considerable amount of hail. Crops round here are looking good.

Miss Margaret Williams was unfortunate enough to be kicked by a horse while visiting at the home of Mrs. M. Olson of Ripley. She is progressing nicely and no serious results are anticipated.

Mr. Fred Brookes-Bailey who was the unfortunate victim of the shooting affray in connection with the capture of the bank bandits recently, has returned from the Camrose hospital and is spending a week at the home of Mr. F.G. Fynn recuperating his strength before returning to duty.

Rev. B.G. Wood entertained the members of the official boards, and their wives of the United Church of Mirror and Ripley on Tuesday evening at the parsonage. A pleasant hour was spent previous to Mr. Wood's departure for Killam.

E. E. Estell reports the sale of two Chryslers to Mr. T.M. Haggarty and R. E. Estell.

Thrills, drama, humor! This is the combination that you can't afford to miss. Tom Mix in "The Arizona Wildcat" will show here on Saturday next.

Mrs. Pilgson of Seward, Alaska, and Mrs. Gillham of Ponoka arrived in town this week and have located in the C. H. Estell building. Their efforts were brought down from Ponoka, Monday last, and they are going to start a much needed ice cream parlor in Mirror.

# Railways and Aircraft Companies In United States Join Hands To Supply Transcontinental Service

This aviation generation will probably not be able to annihilate space, but it is certainly detouring distance. Air lines to the other planets and the nearer stars are not yet in sight, but the stretches of the earth are being turned into aerial trails and the longer travel are being eliminated. The latest combination of speed with comfort is announced in the formation of the "plane-train" services to Los Angeles from New York and return.

It has not yet been begun, but the personnel of its sponsorship assures its early establishment. Within a few weeks it will be possible to reach Los Angeles in forty-eight hours from New York, with two nights of sleep aboard a Pullman. Two railroads, the Pennsylvania and the Atchafalaya, Topeka and Santa Fe—the two leading aircraft companies—Curtiss and Wright—and many strong backing houses have combined in the project. Capital stock up to \$5,000,000 has been subscribed with no public offering, and the company is about to publish its rates, its time schedules and the names of its pilots. The "planes," which will carry transcontinental passengers during the daylight hours, have a capacity of fourteen persons each; meals will be served in the air as on the Pullman and the tourists will be in their hotels at Los Angeles or New York before the light fades on the second day. It is part of the new miracle wrought by the union of science and finance, with "planes" and railroads acting as auxiliaries instead of rivals. Passage by air has become a conventional daily affair in Europe, where generally the scope of men's business interests requires a journey from one country to another and without the handicap of such distances as we have here. To meet the spread of this trend had the new combination has been devised by men equally responsible for management and for transportation. It may be only the beginning of an entirely new system of general travel in this country.

Wipe to the moon will probably have to be left to succeeding generations, which will have left only interstellar spaces as their objective. But now like this about the train, "plane almost leads ordinary citizens to expect a day when their vehicles, Pullman cars by night, will take wings by day and, rising from the tracks, carry them through the air until night comes again.—New York Times.

## Beef Cattle Market

Good Prices Are Secured For Prime Beef

J. T. McCallum, of Melina, Manitoba, last month sold 24 head of prime beef grade transcontinental Hereford steers at prices ranging from \$10.50 to \$12. per hundred pounds to a Winnipeg buyer. The same buyer purchased 15 Aberdeen Angus steers from George Tait, a well known breeder, of Warren, Manitoba, for \$11.20 per hundred weight. These steers dressed 62.5 per cent. They were purchased last October for \$7.50 per hundredweight. At that time they weighed 1,015 pounds, which had increased on farm grown feed to 1,508 pounds at time of slaughter. The grand champion car lot at the Calgary and Edmonton spring shows was sold at \$15. per hundredweight. They were Herefords and were raised by W. P. Fleming, of Calgary.

Kind Old Gent: How old are you, my little son?  
Small Boy (tensely): Eight.  
"And what are you going to be?"  
"Nine."

"Can you lend me ten kroner, old man?"  
"On principle, I never lend money on the first of the month."  
"That today is the month?"  
"The second? Yes, and I never have any left on the second!"—Kasper, Stockholm.

## POPULAR BRIDE-ELECT

Miss Margaret Fleming, of Ottawa, arrived in Quebec recently aboard the "Amsona," en route to Ottawa, where she is soon to wed "Count" Harding, A.M.C. to his excellency the Governor-General.

## Not Always To Blame

Increase Of Crime Not Altogether Due To Foreigners  
The annual report of the Superintendent of Penitentiaries states there were 2,480 inmates at the close of 1927. Of these, 1,847 were born in British countries, and 632 in foreign countries. In detail it is stated that 1,540 were born in Canada, 177 in Scotland and 23 in other British countries. Of the 632 foreign born 209 were born in the United States but their antecedents are not given. As 42 per cent. of the penitentiary inmates were born in Canada we should not blame foreigners unduly for the increase of crime.

To Study Distance Of Stars  
W. F. Harper, assistant director of the Dominion Observatory at Victoria, B.C., told the members of the Royal Society of Canada, that at the Victoria observatory a study was being made to determine how far away the stars were from mother earth.

Building Elevators Rapidly  
A new grain elevator every two days has been the record established by the Manitoba Wheat Pool since building operations began this spring. Close to eighty new elevator plants have been organized this year, and new elevators will be erected at nearly all of them. In building these Manitoba Pool Elevators over three hundred men divided into fourteen crews are employed.

For the second year in succession, the Canadian Oratory Championship, held at Toronto Arena, attracted a phenomenally vast audience, numbering nearly ten thousand. These photographs show, at the left, Wm. J. De La Halle School, London, Ont., declared champion of Canada by the judges, who numbered five, one nominated by each of the participating provinces. Upper right, Miss Swanhild Mathison, of Duke of Connaught High School, Winnipeg, B.C., who was declared second, and lower right, Miss Alice Kane, of the Roblin Consolidated School, Dauphin, Manitoba, who came third. The other contestants were Miss Margaret Kinney, of Victoria High School, Edmonton, and Edith Smith, of Jovnal, P.E.I. Fox gets a free trip to Europe after which will represent Canada in the international contest at Washington.

## Ultra Violet Rays Benefit To Poultry

Effects Greatly Increase Egg Production Says Vancouver Man  
News dispatches from the East a few days ago told of the experiments being carried on by a university professor in studying the effects of ultra violet rays on poultry.

There is nothing new in this for Herbert Traffon, Vancouver poultry man, who has been using ultra violet rays in his henhouses for months. However, the Eastern professor, however, Mr. Traffon has not yet attempted to control the sex of offspring for hatching. It may carry on some experiments in that direction later.

"You can use too much rays of course, but when properly controlled it will work wonders with poultry," said Mr. Traffon. "It has increased egg production tremendously. Some of my hens that had been laying two or three eggs a week suddenly went under the influence of ultra violet rays, laid a new quail on life and laid eggs daily for eight or nine days at a stretch. Another advantage in the use of the rays is that it brings out the sex characteristics in chicks much earlier. And another thing: The rays are sure death to all parasites affecting poultry and in that way accomplish a great deal towards improving the health standards of the flock."

## Farm Girls Win Prizes

Twelfth Annual Farm Girls Rally At University of Saskatchewan  
Prizes for the various judging competitions held in connection with the 12th annual farm girls rally at the University of Saskatchewan recently were presented at the closing entertainment of the conference at Saskatoon.

Margaret Qually and Margaret Gerdis, comprising the Wilcox team won the grand aggregate prize, the Saskatchewan exhibition board cup, which will be held for one year. Each girl also received books from the university. Mary Duke of Kennedy, was the individual winner.

Dairy products—Weyburn team: Ruth Peterson and Olive Pettit; Individual, Ruth Peterson.

Bread—Kennedy team: Mary Duke and Alice Thilston; Individual, Beatrice Day, Monahan.

Poultry—Wilcox team: Margaret Qually and Margaret Gerdis, individual, Mary Baptiste, Lacrosse.

This year 120 girls entered the competitions.

A Toronto controller wants to know if there is any difference between stealing a dollar and stealing a million dollars. There is the trifling difference that one crime usually involves a term in jail.

A conspicuous sign displayed on a new industry is expected to give employment to about a hundred workers.

The most extensive, interesting and readily accessible field for alpine climbers today is found in the Canadian Rockies, particularly the portions included in the national parks of Canada.

## English Visitor Sees Excellent Prospects For the Growth Of Sheep Industry In Canada

### Mosquito Control

Circular Gives Instructions Regarding Permanent and Temporary Control

The females of the majority of species of mosquitoes drink blood, and warm-blooded animals and man are the sources of this particular form of mosquito food. This makes the mosquito an interesting subject for study, and a circular, just published by the Department of Agriculture, entitled "Mosquito Control in Canada," is timely.

While some of these predaceous insects only live for a few days others live for several weeks, and the best way to control them is to make an attack on their breeding grounds. The Entomological branch advocates in this circular the draining and filling in of low places where water accumulates, and the screening of receptacles holding water such as water-bodies. Temporary bodies of water formed by melting snow, rain and floods are common breeding places for mosquitoes.

"Mosquito Control in Canada," which may be obtained on application to the Publications Branch, Department of Agriculture, Ottawa, deals at length with the life history, permanent and temporary control measures, procedure in control campaigns, and protection from mosquitoes. Those who desire to identify the particular species common to their district may send specimens for identification to the Dominion Entomologist, Ottawa.

### Canadian Handicraft Guild

Branch Has Been Formed To Carry On the Work in Alberta

A branch of the Canadian Handicrafts Guild has been formed in Edmonton, Alberta, to carry on the work in Alberta. This is the third branch of the Guild to be formed, Manitoba and British Columbia having formed local Guilds during the winter. Formation of such branches is the aim of the Guild, which obtained a Federal charter as far back as 1906.

Plate Glass Plant For Fort William  
It is announced by Frank Spence, M.L.A. for Fort William, that the Federal Glass Company, of Oshawa, intends locating a factory at the head of the lake for the making of plate glass. The company is negotiating to take over the plant and equipment of the Canada Steel Co., located on the Kaministiquia River, with both rail and shipment facilities at hand. The new industry is expected to give employment to about a hundred workers.

When I started out in the world I had but a dollar.  
"What did you do with that?"  
"Wired home for some more."

A bright future for the Canadian sheep industry is painted by E. R. Hollings, editor of The Wool Record, of Bradford, the wool-marketing center of England. Mr. Hollings visited this country in 1927.

"As I travelled through Ontario, Manitoba, Alberta and Saskatchewan, I could not help asking: 'Where are the sheep?'" writes Mr. Hollings. "Apart from passing a small flock or two on the train I had little opportunity of seeing them."

"It was too early to see any of the new clip, much as I desired to do so. The wool I saw was specially suited for hosiery manufacture. This, I believe, will always be a big industry in Canada, the climate making warm underwear essential. The wool is undoubtedly going to be with the raw material available, and I was pleased to see that farmers are keeping a suitable type of sheep. I should say that the bulk of the wools range from 50's to 55's quality. I was asked if I thought manufacturing needs are such that the flocks in Canada could be increased to 25,000,000, and unhesitatingly replied in the affirmative."

"I have never known a time in the history of the wool trade when the outlook for sheep men was so encouraging. I am not among those who anticipate lower prices. Market values are also good, and I think the outlook is of the best. While every other class of farm produce has fallen in value in England during the past two or three years, those who have kept sheep have found both mutton and wool to be in demand. I would appeal to every Canadian farmer to keep as many sheep as possible, because I think it will pay him to do so. Since return to home I have given lectures on my trip to Canada, and in these as well as on every other possible occasion, I have endeavored to emphasize the opportunities which sheep offer any one with sufficient pluck and enterprise."

One of the most satisfactory things about my trip was that so many Yorkshiremen had gone out to Canada and made a success of the enterprise upon which they had entered. Sometimes discouraging comments are made upon industry in the Old Country, particularly its agriculture. I hope Canadian readers will not accept all such comments literally, for there are many prosperous farmers in England.

"If Canada is to fill its place in the Empire it needs men of the same type to equip its pastoral and agricultural interests. Quite a large number of Englishmen with a good knowledge of the sheep of their native country have settled in Canada, and these should be able to give some good advice, particularly after they have lived long enough in Canada to become acquainted with its climatic peculiarities."

### Farmers' Profitable Venture

Farmers Of Manitoba Own Creamery Valued At \$200,000

Since the Manitoba Co-operative Dairies, Ltd., Winnipeg, began operations in 1921, it has returned to its farmer patrons in interest and bonuses, in cash or credit, nearly \$75,000, according to a recent report by the management. During the same time the members of the association have subscribed and paid for capital stock in the organization to the amount of \$77,202. Thus the farmers of Manitoba now own the creamery in its entirety, valued at \$200,000, and have received returns practically covering their investment. At the same time they have received better prices for their butterfat, and the quantity of butter produced has increased from about 300,000 pounds in 1921 to 1,637,000 pounds in 1927.

Judge—"So you and your wife had a fight? How would you like to go to jail?"  
Understated Husband—"Oh, very much, sir."

Doctor—"Where do you feel it?"  
Patient—"At work"—Lustig's Lokzer Zeitung, Cologne

## In Old Quebec

Quaint Part Of Dominion Where Modern Commerce and Ancient Customs Unite

On the banks of the Richelieu, one of the largest of the tributaries of the St. Lawrence, is a busy modern town where past history and present commerce meet. This is the town of Sherbrooke, which gives its name to a new map sheet of the National Topographic Survey of the Department of the Interior on a scale of one mile to the inch.

Sherbrooke, now noted for its shipbuilding yards, was for a long time the summer residence of the Governors of Canada. Here too stood Fort Richelieu, now commemorated by a cairn, tablet, and fence. This fort, first built in 1612, was rebuilt in 1665 by Captain Pierre de Borel, a French engineer, under orders from the Marquis de Tracy. Leading to it was the waterway from the English colonies on the Richelieu, as a byway of the Richelieu River, Lake Champlain and the Hudson River. In those early days it was the favorite wharf of the French. Now it is the highway for the export to the United States of hay grown on the low lying lands of the St. Lawrence in front of Sherbrooke, and also of pulp wood.

The Sherbrooke sheet in pleasing to the eye, and its features are sharply defined in various colors. The routes of the north and south shore Montreal-Quebec highways shown on the map in red are cut out by secondary thoroughfares blocked in yellow. Many of these lead northward into the Laurentides. These are the well-known paths of the pleasure-seeker, the hunter and the fisherman. Good local roads outlined in black cross the country in every direction. Bordering them are the uniformly ribbon-like farms of Quebec. White-washed dwellings and outbuildings which are also shown in black, lend picturesque to an otherwise rather flat landscape, occasionally relieved by patches of heavy woods and thinner wooded areas.

The town of Berthier across the St. Lawrence from Sherbrooke is part of an old seigniorie granted to the Sieur de Berthier on the 25th of October, 1672, and from him acquired by Alexander Berthier, an officer of the Canadian army, and from him acquired by Alexander Berthier, an officer of the Canadian army, and from him acquired by Alexander Berthier, an officer of the Canadian army.

Panned for having the largest linen factory in the world, Joliette is situated on the Riviere L'Assomption. The city was named after the explorer Louis Joliette. Commercially it is also important as a manufacturing centre for tobacco, paper and lumber.

Along the St. Lawrence here and there are stone houses with thatched roofs, while nestling villages group around a church and rectory vary the scenery inland.

The Sherbrooke sheet is obtained from the Surveyor General, Department of the Interior, Ottawa, upon application and payment of twenty-five cents. The map may also be had on linen back or in folder cover in either English or French for fifty cents.

Indignant Householder (holding up a dead cat): Here, constable, look what I found in my garden. What are you going to do about it?

Constable: Well, you know the law, mum. If it ain't claimed in six months, it's yours!

Baldheaded Man—"Give me a shampoo."

Barber—"Sorry, but I'm just out of facial soap sir."

Babats gun from the milky juice of the babala tree is used in making rubber tubing.

"My husband only married me for my money," is not so stupid as he looks," Fliegende Blätter, Munich.

## REASON SASKATCHEWAN IMPORTS POTATOES

Home Grown Product Below Average Grade Say Dealers

It seems difficult to credit in a fertile province like Saskatchewan that dozens upon dozens of carrels of potatoes are imported from the States. This does not happen because Saskatchewan does not produce sufficient for her own needs, but because the potatoes which are imported are with favor the average run of the home grown product. We have it direct from those who buy them and from Dominion government vegetable inspectors, that the Saskatchewan farmer has not yet learned the way to market potatoes.

During the past year forty-one cars of potatoes were consumed in the city of Regina alone and of these ten cars only were purchased in the province, the remainder coming from Manitoba, Alberta and British Columbia. It is stated that the Chinese of British Columbia are beginning to put up uniform carrels of potatoes; each bag 100 pounds is tagged and the bags do not vary so are the contents. A carlot, artistically graded "Canada B" can be ordered from British Columbia and the buyer can be sure of his order being met. On the other hand, a carlot of Saskatchewan potatoes, such as we ourselves have been unable in Regina, may be described as "nondescript." Reds and whites, small bags and large bags, and a tag that may with difficulty be deciphered.

While we should appeal to the production of "A" class potatoes, the grade known as "Canada B" is easily made up of any grade of potatoes in raising potatoes and is as follows: "Canada B" quality, which shall include only reasonably mature potatoes of uniform size and shape, and which are practically free from dirt or other foreign matter, frost injury, and soft rot, and which are cut, clean, smooth, light, dry or other means. The diameter of potatoes of this grade shall be not less than one and one-half inches.

Our agricultural societies could, no doubt, awaken interest in this subject and it is a matter of good seed, careful production, and improved marketing methods and in this latter sphere, the Provincial Department of Agriculture, through the Co-operation and Markets Branch, would assist. At present the farmers of the province may have their own association or their own pool, but just now it would appear that the marketing of this grade shall be a saleable product on the market—Moose Jaw Times.

## Using Our Spare Time

People Have Not Yet Learned the Use of Their Spare Time

The fact there is considerable unemployment during prosperous times means simply that through improved methods of working we have earned more time for play, but have not yet learned how to use it. When three-fourths of the people can do the work that needs to be done in the country, it means that all of the people are in position to work one-fourth of the time and do it better.

Some are out of work, some do so little that they might be classed among the idle, and others are still determined to work from sun to sun. The human element just will keep conditions from being perfect.

We people are in better shape to be able than ever before, if we only had a manager to tell us how to go about it.

## A Synthetic Diet

Sir Alfred Mond prophesies that one day synthetic food and drink will be used by chemists in factories. There will be no need to till the soil, to breed cattle, to brew beer, to grow wheat, or to import wine. We will all have chemical cocktails. We will break-fast on tablets and dine on pellets. Already synthetic vitamins are being prescribed by doctors in the form of pills. We can chew sunlight and masticate ammonia. But we shudder at the prospect of a laboratory concocted meal. A synthetic diet in its only form for Robots.

## The Beauty Of Red Pine

The red pine is one of the most beautiful trees in Canada for ornamental planting. Its great masses of long dark-green, closely bunched needles contrast strikingly with the reddish colour of its bark, on its straight rugged trunk. It is a splendid tree for drives, borders, and lawns of large grounds.

The royal scepter of Great Britain contains the largest cut diamond in the world.

Lady—"Is this milk fresh?"

Milkman—"Art an hour ago making it, Madam."

## ALMOST PAY FOR THEMSELVES

Use Of Fingerprint System Saves Time and Money

In real life New Scotland Yard is a little more astute than in detective stories, where the lawyer lays aside his brief and the doctor his stethoscope to beat the inspector at his own game. The authorities at the Yard, for instance, are making fingerprints almost pay for themselves, something that the amateur detective can do only by writing a novel in competition with great British fiction.

Records of fingerprints were first made by Scotland Yard in July, 1901. In 1902 almost 7,000 searches and comparisons were made and more than 17,000 fingerprints identified. Last year more than 35,000 searches were made, and more than 17,000 fingerprints identified. A recent annual issued by Scotland Yard goes on to say:

"The number of recognitions effected is not the only test by which the advantages of the system can be estimated. It has brought about a marked saving of time of police officers. On a moderate computation the money value of the saving thus effected covers the cost of the establishment for working the method and all incidental expenses."

Scotland Yard now has on file 420,000 fingerprints. The slips of any known to be dead and the slips of men believed to be too old to commit further crimes, are being removed from the collection. The English police expect the collection to reach its greatest size for purposes of criminal identification within the next few years and thereafter to remain about the same level. When this time comes it will mean that the fingerprint system has been completely established and is no longer a novelty or an appreciated helper of the police.

## Assets Of Universities

Four Western Canadian Universities Have Assets Valued At \$15,292,815

The total assets of Canada's 23 universities are placed at \$17,497,000. Nearly one-third of this total is held by McGill University, Montreal, valued at \$3,214,528 of which \$18,408,965 are in investments and \$9,385,970 in lands, buildings and equipment. The four universities in Western Canada have total assets valued at \$15,292,815.

While about 38 per cent. of the 42,646 students attending the 23 Canadian universities are women, only about nine per cent. or 392 of the 4,263 professors on the teaching staff are of the fair sex.

Brown: "Yes, I have met your wife. In fact, I know her before you married her."

Jones: "Ah, that's where you had the advantage of me—I didn't!"

## 102,000 Play "Langara"

Walter Hagen, professional champion, is the star of the new Canadian Pacific Railway Company's Golf Course "Langara," at South Vancouver, British Columbia, since the first of the season.

Over three thousand players have played the new Canadian Pacific Railway Company's Golf Course "Langara," at South Vancouver, British Columbia, since the first of the season.

The club house of the famous course.

of the leading Pacific Coast professional players has been playing at the club house, three years running professional champion of the U.S.A., who rates the course in the first flight.

On it was played last year the first Pacific Coast Newspaperman's Golf tournament, which has been played since Vancouver. The attendance exceeded 50, and competitors came from as far south as Los Angeles.

Langara, in 8,500 yards in length and as far south as Los Angeles.

## Station Within Arctic Circle

Murmansk, Russia, Is Most Northern Spot Reached By Railroad

Polar circle, which is on latitude 66 degrees, 32 minutes north, just where the Arctic begins. That is why it is the name of a railroad station. This railroad, which crosses the Arctic circle somewhere, which gave the definite location for a station, now grown to a village of two log houses and a small station, also of logs, which holds the co-operative store and the manager's family.

One place seems as good as another for stations in the windward waste of tundra and scrub pine. This is one whose name and place were predetermined. If not historical, it has geographical fame—in fact, world distinction. There cannot be more than one station, possibly in Sweden, on the Arctic circle with railroad service. Also each of its ten inhabitants can tell just where he lives in parlance of degree and minute. Probably few more than that in cities figured in millions can say as much.

There are, on an average, one for every nine miles—clusters of log houses half buried in snow, an occasional bundled family with a reindeer team, which has come for supplies from the bleaker waste beyond—follow until Murmansk is reached, 147 miles within the Arctic circle, and the world's northernmost spot reached by railroad. Murmansk is latitude 68 degrees, 59 minutes, only 14 miles south of Point Barrow, Alaska, the farthest north of the United States.

A new harbor is being built and in a few years it will be a useful as a base for naval operations.

## You're Not Happiest

Peace Of Mind Comes With Acceptance Of Things As They Are

There are few of us who, in our sentimental moments, do not think we would like to have time turn back and give us a second chance to do things over again. Eugene Field, carrying with him the spirit of youth to the day of his death, wrote:

"I'd like to sleep where I'm lying to sleep."

When I was a boy—a little boy."

We forget that when we were children we were no wiser than we are now. We think we were. The sorrows of childhood are exceedingly real. The sorrows and anxieties of boyhood and girlhood are as unescapable and devastating as they are today. Looking backward, life seems like a long summer vacation in those golden days. But it wasn't. With conscience clear and mind at rest with the consciousness of work done as well as we know how, the chance for happiness today is as good for any of us as it was in childhood.

Age is the ripened period of all. Age when it follows a decently spent life, is free from worry and anxieties with any other period. The fires of ambition are longer consumed. The fading of illusions need not mean less of faith and cynicism. Rather, age may bring merely a clearer, more accurate perception of the facts of life. And that is always the way to peace of mind.

Do not fear age. Look forward to it with comfort—Grove Patterson.

## Value Of Farm Production

Average Production Value Per Farm In Three Western Provinces Placed At \$2,248

The total value of the farm production in Manitoba, Saskatchewan and Alberta in 1927 according to a recent compilation is placed at \$202,767,000, which represents an average value per farm of \$2,248. Agricultural products in these three provinces marketed last year had a value of \$122,885,000. An average acre in corn per farm home of \$2,460. Wheat headed the list in the value of farm products with \$407,000,000. The total production of 44,019,000 bushels. Next came other grains with 364,024,000 bushels valued at \$184,001,500; potatoes, 1,000,000 bushels, value \$10,540,000; fodder crops 5,773,300 bushels, value \$90,885,000; dairy products, value \$14,216,213; animals sold and slaughtered, \$40,873,000; poultry and poultry products, \$218,000; furs \$3,685,000; honey, \$1,272,000; wool clip, \$34,402,000. The average value of farm production in 1927 is given as: Saskatchewan, \$340,193,220; Alberta, \$221,588,270; Manitoba, \$104,886,180.

Hungary is to have a college for policemen. The course will be four years. For entrance a high school education will be necessary.

"Don't never talk it's better late than never," said a man who had never talked.

"The Cave Dwellers" "If all goes well, we will have a lift put in next year,"—Guerin Macdonald, Milan.

## Culture of the West

Hon. William Phillips Is Impressed With Conditions In Western Canada

The United States Minister at Ottawa has made a tour of Western Canada, and like most men who have visited that half of the Dominion with their eyes open, he comes back profoundly impressed with the evidence of progress and of the rapid development of the western provinces. For a remarkable change in the material development of the Prairie Provinces and British Columbia since he passed over thirty years ago he was no doubt prepared, but the transformation in that respect appears to have been beyond his expectations. What he seems not to have looked for is the advanced culture of the West. In education, in applied science, in arts and letters, in the general cultivation of taste, and in all that makes for the refinement of life, the Canadian West has at least kept pace with the march made by a wealth producer. We are all too much inclined to take it for granted that a young community, striving along from record yield to new record yield of the products of the soil, and expanding the volume of diversified production, is too intent upon money-making to spare time for the waters of a higher strain. That the Canadian West has not been neglected of the graces and of the things of the spirit, The winter of Western Canada is a fostering nurse of the humanities. It is the season in which material industries and to a considerable extent suspended, and people accordingly have time on their hands. They are able to enjoy the works of the great writers and the great composers, and the performances of the best actors, and can meet together in charming social intercourse. Mr. Phillips found Western Canada to be a country of open-hearted, hospitable people, among whom culture has reached a high level and is spreading more and more. He will be able to tell this story in detail when he returns to his country, is no wild and woolly west, but is the seat of a fine people.—Toronto Mail and Empire.

## Telephone and Telegraph

Exchange Of Facilities Is Under Consideration In Alberta

Ways and means for working out an exchange of facilities between the Alberta Government telephone system and the telegraph companies are at present under consideration and a working agreement with the latter was held recently between W. D. Robb, vice-president of the Canadian National Railway, and R. B. Baxter, deputy minister of telephones. Mr. Robb is referring the question to the head office of the C.N.R. telegraph and it is likely that a working agreement will be reached in some other way, by way of exchange. A similar arrangement, in some parts of the province is already working between the telephone service and the C.P.R. telegraphs.

## Just Select Samples

Farmers John Cites sent his youngest son into the miller's with a sample of his crop of wheat.

"This is splendid wheat young man," he murmured to the farmer's son. "I'd like to buy it from your father. How much has he got like this or you think?"

"Not much," said the boy, "he says it's all the mowing placing that out."

## Grain Shipments To Vancouver

About 32,000,000 bushels of grain have been shipped via Calgary to Vancouver since the beginning of the 1927 and season to local inspection.

to show. This is about double the quantity shipped in the corresponding period of the preceding season and is the first time an increase over the previous record.

## The Cave Dwellers

"If all goes well, we will have a lift put in next year,"—Guerin Macdonald, Milan.

## Tribute To British Flag

Union Jack Made Union Flag Possible  
Says South African  
Councillor

A great tribute has just been paid to the Union Jack, and satisfactorily enough from that country in which there has been some commotion about it—South Africa. A press despatch from there says that native affection for this flag was eloquently demonstrated at a General Council of the Transvaal Territories which might be described as a native Parliament, when the Council unanimously passed a resolution that the Government be requested to permit the Union Jack to be flown with the Union of South Africa flag on all Magistrate's offices in the native territories. A councillor asked the members not to discard their old friend the Union Jack, which had freed them from slavery and which was the only flag they knew. He did not object to the Union Flag, but pointed out that were it not for the Union Jack there would be no Union flag. We might also venture to say that were it not for the Union Jack there would be no Canada as there is today.

## FIGHTING FOR

## BABY'S HEALTH

Is the Constant Care Of Every Young Mother

The young mother who has a constant such a reason for the existence of her little one. Childhood ailments are the bane of every mother, and it is a mother's winning's war that she may have a very sick baby on her hands before she is fully aware of it. There is unless she has a remedy in the home. The Tablets of Dr. Williams' Pink Pills for Pale People are the only remedy for the baby's health. The Tablets are sold by medicine dealers or by Dr. Williams' Medicine Co., Brockville, Ont.

## Tractors On The Farm

Western Farmers Investing More Heavily In Motors For Heavy Duty

There are in Alberta today 77,192 farmers who have 834,242 horses in their possession. In Saskatchewan, 119,562 tractors, and in Manitoba, 21,267 tractors. The survey would indicate that while the horse is yet far from being a back number on Western Canadian farms, the day of the tractor has definitely arrived.

Spate the children from suffering from worms by using Miller's Vermifuge, which is a most effective vermifuge for the young and helpless. It is an excellent worm destroyer, and when its qualities become known in a household no other will be used. The medicine acts by itself, requiring no purgative to assist it, and no thoroughness that nothing more is desired.

## Parachute Lands Plane Safely

Invention Of California Man Proves Feasible In Test

A small biplane has been landed safely from 2,000 feet by means of a huge parachute, without injury to its pilot or damage to the plane. The experiment, performed privately at Santa Rosa, Cal., was designed to prove the possibility of using a parachute for disabled planes to insure safety of passengers. A young biplane pilot, piloted by E. J. McKewen, was used in the test. The plane dropped about 2,000 feet with its motor idle, when the huge parachute, more than 100 feet in diameter, opened out. McKewen stayed with the ship as it sped rapidly slackened. He said he felt only a slight jar when the plane landed and the folds of the parachute enveloped him. The biplane was not damaged, except for a minor leak in the tail shield.

The parachute is the invention of Charles Roderick, San Francisco, with many numerous other airmen, expressed complete satisfaction over the result of the experiment.

Special delivery stamps are manufactured for 10 cents per thousand.

## Progress Has Been Made

Sending Messages By Beam System Is Marvel Of Speed

What beam wireless has done for long-distance communication was explained by H. H. Thompson, chief engineer of the Marconi Wireless Company, to the members of the Montreal branch of the Engineering Institute of Canada. Using slides, the speaker produced a graphic picture showing a telegraph operator in London sending a message by an instrument resembling an ordinary typewriter and sending messages at the rate of 150 words to the minute to be received almost instantly by an operator at Dorchester, England.

Mr. Thompson illustrated the progress made in wireless transmission by showing the crude instruments used in the early days of wireless, the progress has recently made, that equipment of stations used to years ago is of no use today. The beam system itself, he said, was the result of experiments by which all the energy available at the sending station was successfully sent in one direction thus establishing a beam of energy.

## Seed Growing In B.C.

Industry Of Vancouver Island Rapidly Increasing In Importance

Seed growing is one of the latest industries of Vancouver Island, and steadily increasing importance. Vancouver Island seed pea seed sells on the English market from three to four shillings per pound, more than the California seed. The largest sweet pea seed farm is at Duncan which produces yearly about two tons. From 15 to 25 women are employed each year to pick, clean and pack the seed whose excellence and high quality is becoming world-famous.

When Holloway's Corn Remover is applied to a corn it is removed and the callosity comes out without injury to the flesh.

## B.C. Grows Bermuda Onions

Bermuda onions have been successfully introduced into British Columbia, and will be grown for the early markets from sets imported from the Southern States. Last year eighteen acres of Bermuda onions were grown on an experimental way with satisfactory results. The onions cured well and yielded eight tons per acre. The acreage has been greatly increased this year. The crop should be ready to market about July 1.

Some men are sent to hard labor for life and some do it of their own accord in order to make ends meet.

**ECZEMA RASH ON HANDS**  
Troubled For Three Years.  
Healed by Cuticura.

"I was troubled with eczema on my hands for three years. It appeared in a rash and soon turned into blisters. It troubled me much worse when I could hardly get my hands in water or be near heat. My husband and I thought I was going to die. I had to wear old gloves to keep from scratching."

"I saw a Cuticura Soap and Ointment advertisement and sent for a free sample. I got relief from it. I bought more and after I had used it for a while I was cured. I am now (Signed) Miss Beatrice Allen, Highwater, Que."

Get Cuticura Soap, Ointment and Talcum for daily toilet purposes. Write for free sample to: Cuticura, P.O. Box 1024, St. Paul, Minn. Cuticura Shaving Brick, etc.

## OCEAN STEAMSHIP SERVICE

White Star Line Paying Particular Attention To The Canadian Trade

The importance of the Canadian route was a point strongly emphasized by Lord Kylsant at the annual meeting of the White Star Line held in London, Eng., on May 16th, according to cable dispatches to the White Star Line in Montreal.

Lord Kylsant, chairman of the Board of Directors, and a leading figure in world shipping, recalled the days of 1871, when the R.S. Oceanic inaugurated the White Star Line Steamship Service across the Atlantic, and from that date he traced, by progressive step, the development of the company.

The shareholders of the company now number about 15,000, he said, "and after providing for the depreciation of the fleet, and paying the dividend on the preference shares, we recommend a dividend of six per cent. on ordinary shares and the balance carried forward."

"There was," he said, "a slight increase in the number of passengers in 1925 to and from the United States of which we secured a fair share," and "from that point he went on to state that "we have, for some time, been giving our most serious consideration to the important question of the construction of a new mail vessel on which we may continue to maintain the position and traditions of the White Star Line in the North Atlantic trade."

He said that the company has under construction at Belfast a "passenger motor vessel" of over 20,000 tons which we expect to put into commission in the fall of 1926. She will be not only the largest passenger ship engaged in the New York-London trade, but also the first motor passenger vessel to be placed in that service.

"We have," he continued, "given the utmost attention to the requirements of the Canadian trade. In addition to our regular service from Liverpool to Quebec and Montreal, we have placed the new liner, Atlantic, we have established a service from London, Havre and Southampton to Quebec and Montreal, and have more especially to south of England and continental passengers travelling to and from Canadian ports."

"From Channel ports we have placed the Atlantic and the Megantic, the fastest vessel being the largest ship in Montreal."

After mentioning that the White Star Line has transformed the Atlantic, 24,000 tons, into a single steamer, thereby having the largest cabin steamer in the world, Lord Kylsant dwelt on the importance of the Canadian trade. In effect, he said, that this accommodation has enabled many with the desire to travel, but who, for instance, had not been able to gratify their wishes, to realize their ambitions.

"The White Star Line," he concluded, "is carrying a larger share of this class of travel than any other company. Passengers in this tourist category are assured comfort and economy combined with exceptionally low rate of passage money for the return voyage."

Lord Kylsant said that "shipping companies engaged in trans-Atlantic trade used to carry large numbers of emigrants from Great Britain and Ireland and other countries in Europe, but the United States Immigration restrictions have reduced this traffic to comparatively small proportions."

"The Dominion of Canada also has imposed regulations upon immigration from the continent. The flow of emigrant traffic across the Atlantic has been thus much curtailed and the necessity of revenue vessels adapted to carry large numbers of emigrants has been greatly diminished."

"We hope that in time restrictions may be considerably modified, at least in favor of settlers of British stock."

Mr. Derek Oldham, the English agent, is telling a good story against himself. One day recently he was sitting in a comfortable chair and was eating in his car practicing singing scales. He did not realize that the windows of the car were down, and he was being heard by a taxi-driver who was looking at him in a queer way. Turning to Mr. Oldham's chauffeur, he said: "Lammer, I thought I was going to die with you exhaust!"

A man could learn a great many things if he did not think that he already knew them.

## Swedish Air Service Safe

No Damage Or Loss In Three Years Of Operation

Three years of operation without an injury to a passenger or damage to the machines or mail, is the record of AB Aerotransport, the corporation that carries on all commercial aeromarine in Sweden. The company has just announced that during this year 622 of the 640 planned trips were performed. It is subsidized by the government, and conducts regular air service during the summer months, between Stockholm, Helsingfors, Malmö and Amsterdam, and a German concern is operating the latter line from Stockholm to Berlin. The route covered probably will become a stage of the London-Leningrad line.

The Oil For the Athlete.—In rubbing down, the athlete will find Thomas' Electric Oil an excellent article. It renders the muscles and always pliable, takes the soreness out of them and strengthens them for strain. It may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

## Increase In Acreage

Increase in acreage of every grain in the Leithridge Railway division, with an increase of over half in rye, is shown by the first crop report of the Canadian Pacific Railway.

The only thing a man wants, after he gets all the money he needs, is more money.

## How Much Water Should Baby Get?

A Famous Authority's Rule

The Baby Doctor

Baby specialists agree nowadays, that during the first six months, infants should have three ounces of fluid per pound of body weight daily. An ounce is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

The rule is, that in the first six months, infants should have three ounces of fluid per pound of body weight daily. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce. It is a fluid ounce, not a dry ounce.

## Talk Peace To Have Peace

It is now fairly well recognized by students of international relations that one of the causes of war is to be found in the constant traditions of war, in references to "the next war," and surmises as to the varying forms of hostilities will take when nations again take up arms against each other. Those who constantly predict war are, says a college president, "not simply prophets of probable events, they are actual causes of war, generally among the 'chick' course." That is, talk war and you have war.

Forgoing the correctness of this view, it is equally true that if the statesmen and ending war in all countries cultivate the habit of talking peace instead of war, the world will have peace. "The offender world peace is discussed among serious scholars and women," says a United States paper, "the better the prospect that war can be at last composed," and it adds that the more intelligent leaders of democracy the world over can be brought together to consider steps for peace. As they gather from time to time at Geneva the higher becomes the probability that ultimately—perhaps sooner than most of us now believe—war will be abolished.

War after all is largely a state of mind. Let the people of any country of country begin to take a pessimistic view of things and suddenly large-scale business depression and hard times, and it is inevitable that depression and hard times will come. Equally true is it that when people talk prosperity and adopt an optimistic tone, a revival in business and industrial activity follows. It is, instead of the pessimism of the pessimist, and (talk war, people think and talk peace, then peace rather than war will prevail.

It has been reported that the Supreme Court of the United States has set on foot a hundred disputes between States, and in Canada our Supreme Court and the Judicial Committee of the Privy Council have settled numerous disputes between Provinces and between Provinces and Dominion. Why should not disputes between nations be settled in a like sensible way? There is quite as much justification for two States or two Provinces to declare war and fight at each other's throats as there is for two nations to take such insane action.

War is a stupid business. It settles no issues. It comes about when a little group of men get into a quarrel with another little group. The law does not allow individuals to murder each other because they have a quarrel, and international law should, in like manner, outlaw war as a means of settling disputes between nations. War is a crime, and it is inevitable that leaders in these countries have not sufficient intelligence or sufficient politeness to find a way out, so they select the finest men on both sides and set them pounding each other into the mud and blood and blowing each other to bits. The side that can stand this longer is the winner and gets its own way. There is no reason engaged in the settlement.

Sir Esmé Howard, British Ambassador at Washington, in a recent address said: "If it is not to be proved to a man that if his country goes to war for any issue short of the obvious, history of action at home, and in defence of that liberty, he will in future stand a very good chance of being bombed in his home; if we can show him that even though his country may be victorious, he will certainly have his taxes increased by \$60,000,000 or \$500 per cent; if we can make it clear to him that for the sake of some issue to which he is probably an entire stranger he risks having to give up that new Ford new car, or even worse, and that he may very probably be thrown out of his home, as has been the fate of millions in Europe after the last war, then perhaps he may find war less pleasingly dramatic and may best himself to see that as a means of settling disputes between nations, it is better abandoned. He is far as statecraft is concerned, the fear of war is the beginning of wisdom."

Some people may be inclined to doubt the value of Peace Talks, International Conferences, and treaties between nations outlawing war, but the fact is there are all factors in convincing people and helping to create and emphasize a peace consciousness in all countries. And let it be repeated and emphasized, the creation of such a consciousness is the strongest of all guarantees for the maintenance of peace.

## Due To Irrigation

There are now eight irrigation projects in Southern Alberta covering a total acreage of 40,144, or, of which 158,800 acres are irrigable. One of the projects, the Leithridge Northern Irrigation District, reported having doubled its irrigated area within the past two years, trebled its production and increased its population two and a half times.

## Medical Aid Caravan

A medical aid caravan will circulate through Northern Alberta this year. It has been sent by the provincial department of health and is in charge of Dr. B. T. Washburn, superintendent of the University of Alberta hospital.

The boom cost by the latest monster candle, is estimated at 350,000, 600 candlepower.

**When Pain Comes**  
Phillips' Pain-Exterminator  
The trouble is not in the pain, it is in the pain. It is a pain, not a dry pain. It is a pain, not a dry pain.

What many people call indigestion, very often means excess acid in the stomach. The stomach may be over-stimulated, and food sour. The corrective is an alkaline, such as Phillips' Milk of Magnesia. The best alkaline known to medical science is Phillips' Milk of Magnesia. It has been maintained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless,

intensely alkaline water will neutralize instantly many times as much excess acid as the most powerful antacid. You will never use crude medicine again once you learn the efficiency of this. So get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia. Rich beverages by doctors for 50 years in correcting excess acid in the stomach. Rich beverages by doctors—any drugstore.

## STARTLING IDEAS SHOWN

## • IN LATEST INVENTIONS

## Rubber Fenders and Trick Car-buretor Some Of Newest

Spring, which so often is credited with inspiring a young man's fancy with amorous thoughts, holds its inspiration for many other types of invention. One is the flimsy automobile inventor who at this season responds to a renewed urge to seek recognition of his originality in the offices of the motor car engineers.

This throng of inventive optimists again descends upon engineers with usual insistence. They come from every direction for personal interviews and flood the mails with innumerable original proposals. Here are some of their startling ideas:

Rubber fenders for bouncing through traffic.

A celluloid surface for a car finish with several layers which can be peeled off annually to give the car a fresh appearance.

The 1928 model of perpetual motion.

A carburetor that uses the gasoline all day, keeps the engine humming and then returns the gas to the tank every evening.

A radio ignition system with call letters for each cylinder.

A warning light on the instrument board which becomes illuminated when the driver exceeds the speed limit.

Inventors volunteer to correct any fault that isn't perfect in the automobile field. Certain-bell invention of their species. Other inventors make full attempt before they are invited, and if some one could invent a way to correct this, more value would result to all concerned.

"Every suggestion by personal call or letter is carefully considered," said a Kalamazoo consulting engineer.

"Many of the inventions have already been invented, others have been tried and failed, but sometimes there may be a merit."

## Puzzling To Tourists

## Americans Know Practically Nothing About Canada's Banking System

American tourists motoring through Canada are puzzled by the size of the figures on the bank windows. After being accustomed in the smaller towns across the line to see some such figure as "Capital \$100,000," the total resources, \$110,000," painted on the front door of their local bank, they are puzzled by the Canadian bank windows. Canadian banks have been lettered "Capital \$200,000; Reserve, \$500,000,000." They must be a million dollars and more, they thought, but a small town support a large bank is the natural question.

Asked by a person who does not understand the Canadian banking system, And there are millions in the States, including bankers in border towns, who are puzzled by the size of the figures on the Canadian bank windows.

Consider the recent example of a Detroit bank that refused to accept a signature of the minister of finance unless it was signed by an officer of the bank. And he refused to accept the signature of the minister of finance unless it was signed by an officer of the bank.

The minister of finance is a man of letters and a man of letters is a man of letters. The minister of finance is a man of letters and a man of letters is a man of letters.

Many of Canada's leading social and sporting clubs use Red Rose Orange Pekoe Tea exclusively. The added strength and inviolable flavor of Red Rose Orange Pekoe make it last longer, go farther and taste better. Packed in damp-proof aluminium.

## Cardinal Newman On Style

To Produce Good Literature Put Your Thoughts Into the Simplest and Clearest Words Possible

"I have no style," wrote Cardinal Newman. "All my life I have tried to think out clearly what I know, what I see, what I feel, and to put it into the simplest and clearest words. That is all my style. To produce literature you must first of all know what you are writing about; write in as simple words as you can; cut out the purple patches; be sincere without being dull; grip the subject before you; feel it, and translate it into the simple English our fathers have handed down to us."

## NEGLECTED ANEMIA

Often Leads To The Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anemia. Usually the first noticeable signs are pale lips and cheeks, dark rings under the eyes and a feeling of tiredness. Then follow headaches, backaches, palpitations and breathlessness.

The only way that anemia can be overcome is to get the blood flowing again because of their wonderful blood-cleansing and blood-making properties.

That Dr. Williams' Pink Pills have won such great success in the treatment of anemia is often made known by those who have been cured.

"Thousands of young girls who were in an anemic condition over their present good health to Dr. Williams' Pink Pills," writes Miss Kate McEachern, Port Hood, N.S., "I got the day I began to take Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells, and occasional fainting attacks. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I found that I was getting on my feet again. I was well again. I hope my experience will lead others to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well again.

Dr. Williams' Pink Pills are sold by all medicine dealers or will be sent by mail to you on receipt of the Dr. Williams' Medicine Co., Brockville, Ont.

Sale of Farm Machinery

Sales of implement and machinery houses in Western Canada are far ahead of last year. It has been practically impossible to supply the demand of small tractors, according to the reports of dealers. Given a fair crop this year, it is expected that the sale of combined reaper-threshers will be at least double that of last year.

Wise mothers who know the virtues of Mother Glycerin, Violette Zouineur, always have it at hand, because it keeps its value.

Bank Closes Largest Sign

The largest outdoor advertising sign in Detroit has been made by painting the windows of the First National Bank building in Detroit.

The sign is a large "1st" numeral. The numeral is five stories high, extending from the eleventh story of the big building. The letters "1st" extend eight stories.

For Rheumatism Use Minard's Liniment

Most of the bala of Canada are only insects, but there are a few irritating bala in the extreme south of the United States and many in Mexico and Central America.

The only thing you can tell by some watches is what time it isn't.

The Least Excitement Made Her Heart Palpitate and Flutter

Mrs. Andrew Oates, Elginburg, Ont., writes: "I suffered for some time with a bad heart which seemed to be controlled by my nerves. The least excitement would cause it to flutter and palpitate, and I was told I was really far gone. I suffered in this way for some time when, one day, I was advised to try them."

I had not taken a few boxes when I felt better, so I continued taking them and in a short time my heart felt entirely normal."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Minard's Liniment for insect bites.

## Teeth and Health

Insured by The Canadian Dental Hygiene Council and The Canadian Dental Association

DENTAL HEALTH PILLARS

"Sugar and spice and everything nice" may be what little girls are made of, but certainly such a diet would never build strong, healthy little girls and boys.

With the child properly started on the road to health, through the mouth, careful dietary habits, there must be no slackening in this regard. If it is to continue safely along the way.

Proper diet from the nursing period up through adolescence has much to do with teeth and health. It is now known that the child's role in the formation of healthy teeth begins in their early degeneration and decay, but hand in hand with this must go the maintenance of cleanliness through training the child in the best and most thorough mouth hygiene.

The notion that the deciduous teeth being replaced by successors can therefore be allowed to go without the care necessary to keep them sound and comfortable is most mischievous. Too early loss of these little teeth from any cause, leads to disturbances of the permanent dentition with consequent general disorders.

It would be better for the young child to know the taste of sweets too soon, thereby avoiding their craving at this early age when they may be harmful to the teeth, than to have a body full of sweets.

Plain wholesome foods should be the rule in feeding children of milk, because it is both rich in nutrient qualities and easily assimilated, is the perfect food for the young child.

Parents should be reminded too, that the child should be brought to the table at regular intervals, at age and thereafter at stated intervals. Preferably the first visit should be made before there are any cavities in order to establish the confidence of the child in the dentist.

Many of the dread of dental treatment, with its consequent neglect of mouth conditions, are the result of an early visit to the dentist. This has arisen through recollections of a painful experience, and the tender years.

Parents should be further noted that the susceptibility to tooth decay is greatest in youth, most cavities appearing before the twenty-first birthday.

That the period of adolescence and before, is the time when an increased dental care is necessary, is a fact which marks the high-water mark of dental hygiene.

Due to the rapid physical changes occurring at this time, an increased caloric supply is present in the diet. This, if not properly handled, is a source of dental trouble.

Systematic dental examinations are the three pillars of dental health.

Ocean Ships For the Great Lakes

Transp Steamers From Europe Proceed Their Way Into The Great Lakes

One indication of the fact that Lawrence canals were deepened, sea-going freighters would come up to the ports on the great lakes is that this is already done by transp steamers, which are able to go through the shallow St. Lawrence canals. A German liner from Hamburg is now lying at the docks of Detroit, waiting on a cargo of motor-cars which it will unload at Barcelona, Spain. For years it has been the custom of the shipping line to push its way into the great lakes in search of a grain cargo. If these things happen with 10,000 tons of cargo, it is a safe prediction that there is traffic if it is possible to get there.—Mantolva Free Press.

Attacked By Asthma. The first fearful sensation is of suffocation, which hour by hour becomes more desperate and hopeless. To such a case the relief afforded by Dr. J. D. Kellogg's Asthma Remedy seems nothing less than miraculous. Its help is quickly apparent and soon the dreadful attack is mastered. The asthmatic who has found out the dependability of this sterling remedy will never be without it. It is sold everywhere.

Canada's New Status

New Receding General Recognition In International Procedure

The peculiar status of the British commonwealth has received international recognition says the London Sunday Observer, in commenting upon the action of Secretary of State Kellogg, in sending an invitation to the British Dominions and India to join the British government in participating in his convention to be held in London.

The Observer expresses the opinion that it would be easy for the United States to make difficulties over extending to the British Dominions and India to join the British government in participating in his convention to be held in London.

## A Girl Trapper

Follows a Trap Line Near Her Father's Homestead

Miss Jean Cameron, who came to her parents from England at the age of four, ten commenced trapping in the district of her father's homestead. Today, at the age of 21, she finds it quite a lucrative and congenial pursuit and quite superior to any occupation which would keep her in the city. She follows a trap line with a ten mile radius of her house and her catch includes coyote, lynx, weasel, and fox.

Always Ready and Reliable.—Practically all pains arising from inflammation can be removed with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is due to the inflammation time which is quickly soothed. This first aid remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

Over Fifty Minerals Being Produced

A notable feature of the program of the Dominion is a mining survey. It is the diversity of lines along which Canadian mining has advanced. Some fifty different minerals, metallic and non-metallic, are listed in the production figures for 1926, and this number includes a variety such as nickel, cobalt, silver, gold, lead, silver, copper, and zinc, in which Canada either leads world production or ranks among the greater producing nations.

A Swedish count is coming to Canada to learn farming by working as an agricultural laborer, and the question is, what farmer is going to take the count?

## Sick Stomach Teaches

Her a Good Lesson

Miss Jean Cameron, N. Y., writes: "I had become accustomed to eating each day with a heavy head, my stomach was frequently clogged and constipated. I felt greatly relieved after taking your purely vegetable laxative."

CARTER'S LITTLE LIVER PILLS. All druggists—25c and 75c per box.

## Unique Missionary Meeting

Delegates Spoke In Many Languages But Are United In Work

At Jerusalem there recently gathered 200 Americans, Europeans, Africans, Europeans, Indians and Filipinos. They formed what was called a missionary meeting, having been constituted by the joint action of 200 societies to whom some 50,000,000 people on both sides of the Atlantic annual the spending of \$10,000,000 annually. But it did not mean the traditional missionary meeting known to our grandfathers. No map on the wall partitioned off the world into white and dark spots. No appeal was made to send forth young men and young women on the ground that so-called "heathens" were dying in their sins and had no chance of a happy hereafter.

As to the composition of the meeting, moreover, there were no delegates from such English and Scotch parishes together. There were almost as many delegates from India as from the United States. There were more Africans than French.

Never before, perhaps, in any part of the world, had there come together so unique and distinctive a group meeting not only at the most sacred place known to Christians but at a point where Europe, Asia and Africa practically lapped one another. They spoke in many languages; they sang and prayed and debated in different tongues. A bilingual hymn book containing songs printed in German, French and English was used most of the time.

But the members of the meeting group were united by one sacred desire. They want to make the world better than it is.

Lead were the protests at Jerusalem against the employment of little children as young as four years of age for 10 hours a day in the rumbling establishments of Persia.

Against the exploiting of Indians in the juke factories of Bombay, which return a profit of as much as 400 per cent. annually; against intolerable conditions in the sugar factories of Uruguay, whose owners in New York and Boston may be quite oblivious to what is going on; against the sending of motor truck loads of alcohol into Central Africa in the hands of men who live in Western nations may be enriched.

The most earnest discussion at Jerusalem related to the problem of the industrial situation upon the weak and the destitute—a problem that was seen to be common to the Occident and the Orient. The West came in for some healthy beating from both Westerners and Orientals, and it was shown again and again how handicapped the missionary is because men of his own race go to the same lands, introducing the virus of Western civilization and the type of industrialism and commercialism against which in America, England and Germany, the workers are themselves protesting and working.

## ATTENTION, WOMEN OF MIDDLE AGE!

Mrs. Goodkey Tells Her Experience with Pinkham's Compound

Bymora, Alberta.—"The change of life was the trouble with me and I was not getting on my feet. I was weak and had no appetite and could not do much work. I was taking Pinkham's Compound and I feel like a new woman. I saw it advertised in the papers and tried it. I am feeling better and I have recommended it to a lot of women friends. Mrs. Wm. Goodkey, Bymora, Alberta."

## WOULD AMEND THE DOMINION ELECTIONS ACT

Ottawa.—Parliament will address itself next session to the amending of the Dominion Elections Act if the report of the committee on privileges and elections is adopted by the House of Commons.

The committee, under the chairmanship of J. J. Denis, Liberal, Joliet, considered their report, the fruit of several weeks of investigation into the Athabasca elections of 1925, where an inquiry by Mr. Justice Clarke, of Edmonton, established that corrupt and illegal practices had taken place.

The committee will recommend to the House that since the report of Mr. Justice Clarke discloses that the cause of the corrupt practices in Athabasca was due to the participation, ignorance and incompetency of certain election officials, the auditor-general should submit to the Department of Justice a full statement of the payments made to the aforesaid officials with a view to instituting proceedings for recovery of the amounts so paid to such officials, if the law provides for such action.

It is also recommended that a special parliamentary committee be appointed next session to examine the evidence and deliberations of the present committee on privileges and elections, to study the Dominion Elections Act and to give special attention to the method of selecting returning officers and the preparation of voters' lists.

Further, it is urged that the chief electoral officer should recommend to the proper authorities that prosecutions be taken against all violators of the Dominion Elections Act.

## Civil Aviation In Italy

Development Is Rapid and Country Holds Third Place In World

Rome, Italy.—Italy now ranks as third country in the world in the development of civil aviation. It comes immediately after Germany and France, in the order given, and is ahead of England, which occupies fourth place. By the end of 1925 Italian air routes will total 2,915 miles over land. Daily passenger service in either direction will be effected. The whole field of civil aviation, ever since Lino Balbo became Under Secretary for Air, has been regulated by such amazing speed that many miles already have been added to the total number of air routes.

## Vote Run For League

Ottawa.—The House passed a vote of \$100,000 for Canada to contribute to the League of Nations. Hon. Hugh Guthrie brought up the question of German currency held by the Canadians, which had been registered by the German Government. The Prime Minister pointed out that before the Government could do anything in the case it would have to consider the whole question of speculation, which would be very difficult indeed.

To Aid Mental Hygiene Research  
Toronto.—The Laura Spelman Rockefeller Memorial, founded by John D. Rockefeller, has announced its intention to assist mental hygiene research in Canada by the grant to the Canadian National Committee for Mental Hygiene of \$100,000 to be spent during the next five years. This is conditional upon the raising from Canadian sources of an additional \$200,000 during the same period.

Rumor Is Denied  
Winnipeg.—Rumors in circulation to the effect that he had been offered the presidency of the University of Alberta were denied by Hon. J. G. Macdonald, premier of Manitoba. "The rumors are without foundation," he declared.

Complain About Expenses  
Ottawa.—Complaints of Canada House were heard in the House when reports of \$10,000 for contingencies and \$30,000 for salaries for the high commissioners office in London were under discussion. After considerable debate, the item carried.

Turco-Italian Treaty  
Rome.—Premier Mussolini and the Turkish Minister Shadi Bey, have signed a five year bilateral treaty binding Italy and Turkey to neutrality, arbitration and conciliation.

Tornado Near Kansas City  
Kansas City, Mo.—A tornado struck Englewood, a suburb between here and Independence, Mo. Two street cars were reported wrecked. Automobiles were sent to the scene.

W. N. K. 1726

## Operate On Cost Basis

Alberta Wheat Pool Elevators Adopt New Policy

Calgary.—Wheat Pool elevators in Alberta will be operated on a cost basis to patrons. This decision was reached by a full attendance of Pool delegates in convention here.

The new policy laid down will represent something new in co-operative wheat in Canada, if not in the world. It means that the members will be charged only the bare cost of the elevator facilities.

When they haul their grain into Pool houses no service or elevator charges will be made. At the end of the fiscal year the actual operating cost will be available and will be deducted from the final Wheat Pool payment.

## Would Provide Work For Ex-Service Men

Resolution Favors This As Best Memorial To Earl Haig

London.—The ex-service men in the British Legion conference passed a resolution to the effect that the best tribute that could be paid to Earl Haig would be providing work instead of relief for ex-servicemen. Lady Haig was present and said this would have met with the approval of her husband, whose desire would have been, not a statue of himself, but that the men who had fought in the war should be helped.

It is understood that the resolution and Lady Haig's remarks were not intended to depreciate the idea of a national memorial to the late Field Marshal, which the Government is now considering.

British ex-service men will attend the conference of ex-service men, in former enemies, to be held at London next September.

## Inspection Satisfactory

Object To Examination Of Immigrants By Canadian Doctors Unwarranted

Toronto.—We have examined copies of the report which has been raised against the examination overseen by Canadian doctors of assisted passage immigrants and we have found one thing will hold water," declared Dr. David Clark, assistant Deputy Minister of the Department of Natural Health, in an interview here.

Articles appearing in certain sections of the British press against the policy of having Canadian doctors conduct examination of immigrants were full of inaccuracies, he said. "The causes of a decrease in immigration to Canada this year," continued Mr. Clark, "lie deeper than the medical inspection policy. One of the chief causes of the decrease from Britain, he felt, was the feeling of increasing optimism there.

## Replace Provincial Police

R.C.M.P. Have Taken Over Work Of Saskatchewan Force

Saskatoon, Sask.—The Saskatchewan Provincial police force passed into the pages of history of the northwest, their activities being taken over by the Royal Canadian Mounted Police, the Saskatchewan sub-division being under the direction of Inspector John Kelly, who transfers from the disbanded force to the newly formed force. The members of the R.C.M.P. will join the R.C.M.P., while the following members of the latter force, located at the Saskatchewan detachment for some time will carry on: Sgt. A. Drysdale, Detective Sergeant, C. E. Hillyard, and Constables T. Theriault and P. W. English. The first two have a long service record in the force, dating back to the old Northwest Mounted days.

## Inquiry Is Ordered

Ottawa.—The parliamentary investigation inquiry has approved a motion for a return showing all special immigration permits issued from January 1, 1920. The report will show the number of permits, the names of the persons to whom they were granted, the names of the persons to whom they were granted, and the names of the persons to whom they were granted.

## Applaud Constabulary Board

Ottawa.—A constabulary board has been appointed to investigate the constabulary strike in Calgary. Mr. Justice Clarke will be chairman, James H. Macdonald, premier of Alberta, and Mr. Justice Hevitt, the men. The men are asking for an increase of 12½ cents an hour.

## U.S. Honors War Dead

Thousands Attend Memorial Service At Arlington Cemetery, Washington

Washington.—The White Crooked rolling hills of Arlington heeded the call of citizens, soldiers and sailors of the national capital for the annual memorial service, May 30, at the graves of the fallen heroes of all wars.

For the first time since he entered the White House, President Coolidge led the nation in memorial day exercises outside of Washington. His annual tribute was paid in an address near the spot where Abraham Lincoln made his immortal address in Gettysburg, Penn.

Practically the entire day was set aside for services arranged by patriotic and veterans organizations. A feature was a parade of veterans of all wars through the downtown streets and over to Arlington. Sir Esmé Howard, British Ambassador, and Hon. Vincent Massey, Canadian minister, took part in the exercises in Arlington cemetery, where they decorated the graves and the Cross of Sacrifice erected by the Canadian Government in memory of Americans who died while serving as members of the Canadian corps.

## POOR SALARIES PAID SCIENTIFIC AGRICULTURISTS

Ottawa.—A motion to go into supply in the House of Commons prompted C. G. Coote U.S.A., Macleod, to protest that salaries paid to men in the scientific and technical positions of the department of agriculture were inadequate.

Mr. Coote declared that the department of agriculture was losing the professional men because of the low salaries which were paid. He gave a comparison between salaries paid in the United States service and in Canada to illustrate the fact. Canada paid much less than the U.S.

The professional service of Canada said Mr. Coote, must compete with that of the U.S. for men, as things now stood many Canadians went to the U.S. to take post-graduate university courses. Frequently they remained there because of the fact they could obtain more money in that country.

Mr. Coote compared salaries paid in the cereal division of agriculture with those paid in the geological survey. He declared, Agriculture showed that the salaries in the cereal division were lower. Canada could not afford to lose her scientific agricultural men, he declared. Agriculture was Canada's basic industry and wheat growing was the most important phase of that industry.

J. H. Steedman, Liberal-Progressive, Bouris, declared the question of the salaries paid to scientific agricultural men was a most important matter which had come before the house this session. It should be realized that the property of Canada depended largely on her agriculture, yet the ravages of disease were spreading in certain quarters of agricultural Canada, and it was of prime importance to the Dominion as a whole that adequate salaries be paid our scientific agricultural officials so that their research efforts could be used for the benefit of agriculture in this country.

## Plane Service Cuts Two Days

Pilot J. H. St. Martin accepts the first shipments of parcels by the new Canadian Pacific air-express service. It leaves for each direction between Toronto, Ottawa, Montreal and Rimouski, where the steamers are met, the new service cuts two days of the regular schedule. Domestic traffic between the cities mentioned is also accommodated to time-saving advantage.

## May Receive Appointment

The possibility that a Canadian judge will take the place on the permanent court of international justice of The Hague left vacant by the resignation of John Bassett Moore, of the United States, is now openly acknowledged in well-informed circles at Washington. Already, it appears, the name of Mr. Justice Riddell, of Toronto, is being mentioned as a likely successor to the American jurist.

The possibility that a Canadian judge will take the place on the permanent court of international justice of The Hague left vacant by the resignation of John Bassett Moore, of the United States, is now openly acknowledged in well-informed circles at Washington. Already, it appears, the name of Mr. Justice Riddell, of Toronto, is being mentioned as a likely successor to the American jurist.

## Bill Defeated In Senate

Government Measure To Amend Naturalization Act Thrown Out In Upper House

Ottawa.—The Government bill to amend the naturalization act was killed in the Senate.

The bill would have placed authority for the granting of naturalization certificates in the hands of the secretary of state without its being necessary for the applicant to make prior application to court, as now required.

The bill met stormy opposition in the Commons.

It was discussed at some length by the Senate recently in committee of the whole. Eventually Senator Laird moved that the committee rise. This was carried by 38 to 29. The effect was to kill the bill. Senator Macdonald, Government leader, explained the measure, which he said would simplify procedure and prevent abuses. The state department had a well-trained staff to handle the work. Experience had shown that court inquiries on naturalization were absolutely useless.

## A Martyr To Science

Noted Doctor Is Latest Victim Of Scientific Ignorance

London.—News was received here of the death of Dr. William Alexander Young, director of the Gold Coast Colony. Dr. Young was a co-worker with Dr. Hildegarde Young, who died recently at Accra, of yellow fever, resulting from his researches into the origin of that disease.

It is believed here that Dr. Young contracted the disease in the course of his researches with Negroids. Young was of Scotch descent and had a long experience with tropical diseases. In 1924 at the comparative early age of 35 he was appointed to his present position.

## Record During March For Canadian Roads

Railways Carry More Freight Than In Any Previous March

Ottawa.—The Canadian railways carried more freight during March, 1926, than in any previous March. Gross revenues also were the largest earned in March, exceeding those of March, last year, by \$2,125,470, or 55 per cent. Although operating expenses were heavier than in 1925 by \$1,202,220, or 3.9 per cent, net revenues were higher by \$983,250. The large carry-over of grain has been an important factor in the heavy traffic and earnings of the railways during the first quarter of 1926. The movement of grain to the Pacific ports being particularly heavy. The March payroll was heavier than in 1925 by \$1,037,125, and the average number of employees increased by 3,022.

Canadian National Railways increased in gross revenue, compared with March, 1925, for \$766,717, or 4.5 per cent, for an increase in passenger traffic of 6.3 per cent, and a 10 per cent increase in passenger traffic of 6.3 per cent.

The Canadian Pacific Railway increased in gross revenue, compared with March, 1925, for \$1,333,348, or 8.8 per cent. Passenger and express revenues showed decreases but all other accounts were larger, freight by 12.5 per cent.

## Has a New Mission

Premier King Requested To Arrange For Necessary Rainfall To Ensure Good Crops

Ottawa.—Premier King has a new mission. The latest request is that he should appoint himself rain-maker extraordinary to Saskatchewan. "We have had a wonderful seeding this year and everything is now in the ground in good shape," runs a letter from Saskatchewan, which Senator Laird is joining in the Senate recently, "I wish you would draw the attention of the Prime Minister to the desirability of arranging for a copious supply of rain each week for the next three weeks, and we will guarantee to deliver the greatest crop Western Canada has ever produced."

## Ontario Joins Manitoba

In Legal Fight With Federal Government Over Regulation Of Securities

Toronto.—Announcement has been made by Hon. W. H. Price, Attorney-General for Ontario, that the province is joining with the province of Manitoba in the latter's legal fight with the Dominion Government over regulation of certain rights in connection with the regulation of securities.

Edwin Bayly, K.C., Deputy Attorney-General, will leave for England June 15, and will appear with Hon. W. H. Craig, K.C., counsel for Manitoba, when the case is heard by the Privy Council early in July.

## COOLIDGE MAKES STRONG PLEA FOR WORLD PEACE

Gettysburg, Pa.—In the first speech to be delivered by a president on the Gettysburg battle field since Lincoln's immortal address, President Coolidge, in connection with the Memorial Day exercises, voiced a plea for the abandonment of war as the bitter tribute to the war dead of America.

At the same time he sounded less indifference to crime in the U.S. and condemned what was described as a tendency of the legislature to exceed the powers delegated to them by the constitution. These things, he said, tended to weaken the regime of law and breed turbulent populations, prone to war.

Declaring the "one thing we want above all else for ourselves and for other nations is a continuous peace," Mr. Coolidge reviewed negotiations by the state department for peace against war and for arbitration treaties.

The Brand proposal that the United States and France sign a treaty to encourage war was described by the President as having developed into "one of the most impressive peace movements that the world has ever seen."

"It is my earnest hope that success may crown the negotiations now in progress," he said. The ideals which have inspired the French minister of foreign affairs and the secretary of state of the U.S. in their joint efforts to find a solution of the problem of peace, may find a solution of the problem of peace."

## FLAG QUESTION CAUSE OF RIOTING AT CAPETOWN

Capetown, South Africa.—Rioteers of police from all parts of the province were drafted into the city to cope with the threatening situation which developed when a demonstration, said to have been inspired by British troops, gathered workers, ran counter to the celebration of the 18th anniversary of the establishment of the Union of South Africa.

The celebration was historic because for the first time the new national flag was flown along with the Union Jack, and Premier J. B. M. Hertzog and General Jan Christian Smuts, former premier and present prime minister, were present on the same platform and delivered patriotic speeches.

Bombs witnessed were re-named when excited crowds filled the streets and several ugly incidents occurred. Colored people were prominent in the demonstrations and automobiles carrying miniatures of the new Union Jack were partially wrecked, but vehicles which carried miniatures of the Union Jack were not touched.

The police were forced to charge the mobs several times. A dozen police and a large number of colored people were injured, while 90 persons were arrested.

In his address at the celebration Premier Hertzog said the new flag was a "lasting symbol of the independent existence of the power and authority of the South African nation."

Referring to the flying of the new flag alongside the Union Jack, General Smuts declared the new flag was a "lasting symbol of the independent existence of the power and authority of the South African nation."

## Stops Operations Of Bogus Stock Salesmen

Ontario Government Has Put Many Out Of Business

Toronto.—More than a hundred swindlers, of doubtful respect, and high pressure security salesmen have been driven out of business recently as the result of the clean-up campaign inaugurated by the Ontario Attorney-General's Department when the Securities Frauds Prevention Act was put into force recently.

According to the department some of the offenders have been jailed, others are out on bail pending appeal and a majority have been deported to the United States, from whence they came.

## Receive Degrees At McGill

Honorary Degree Conferred On Five Distinguished Candidates

Montreal.—The honorary degree of Doctor of Laws was conferred on five distinguished candidates at the 1926 convocation of McGill University.

The recipients were: Sir Wilfrid Grenfell, famous Labrador missionary; Rev. Canon Oyle, Toronto; John Reid Hall, director of the New York Zoological Park and a graduate of McGill; George Jales, principal, and Julian C. Smith, Senator.

Sir Arthur Currie, warrior, had not sufficiently recovered from his recent illness to be present.

Princes Plan African Trip  
London.—The Prince of Wales, who plans a tour of Africa next autumn, will be accompanied by the Duke of Gloucester (Prince Henry), and the Royal brothers will be absent for four or five months. The date for the departure has not been set, but it is in their aim, after visiting Mombasa, Kenya, Tanganyika, and Rhodesia, to spend Christmas in Capetown.

## Immates Of Canadian Prisons

Ottawa.—Canadian penitentiaries have at present a total of 2,580 inmates. Of this number, 2,536 are men, and 44 are women. Canadian-born number 1,614, and in all 48 nations are represented. This information was given in the Senate in reply to a question by Senator J. P. B. Cullen.

## Against Fast Time

Vancouver.—Vancouver residents will continue for the remainder of this year to work and play on standard time, the idea which was voted four to one the citizens today voted against adoption of daylight saving time for the summer months.

Germany has a shortage of skilled labor.

Those present included Mr and Mrs McCornack, Mr and Mrs King, Mr and Mrs Chas. Scales, Mr and Mrs Fraser, Mr and Mrs Geo. Mrs J. P. Walters left on Tuesday to attend the Eastern Star convention at Calgary.

## Capt. Dancy Meeting

Community wide interest has been awakened in the approaching visit of Captain S. N. Dancy, the apostle of Canadianization, who comes to Mirror on Friday of this week as the guest of the Mirror W.I. and the Elks and will address a group of meetings. Word that comes through to Mirror from other neighboring communities where Captain Dancy has already spoken, is to the effect that the citizens of Mirror have a real treat in store for them.

There is not a better known or more popular man on the public platform, today than Captain Dancy, and his message is one that will appeal to all classes of the citizenry. He speaks freely and frankly of the problems that face the Canadian people and the program he brings is national in character and scope, and although organized and sponsored by the Elks and the Canadian Legion, yet, behind it stands every patriotic organization in Canada.

Friday's list of meetings for Mirror includes the echo at 10:30 a.m., a board of Trade luncheon at noon, a meeting of women in the afternoon, and a community gathering, at 8:30 p.m. to which the general public is invited. All local organizations are co-operating with the W.I. and the Elks in promoting the success of the day. From the rural districts have come assurances of support, because, everywhere, the farmers of Alberta have stood solid behind Capt. Dancy and his program.
